

STOP THE NSW POWER SELL OFF!

The NSW Government is planning to privatise the publicly owned electricity network.

The publicly owned electricity companies include Essential Energy, Transgrid, Endeavour Energy and Ausgrid.

If these publicly owned electricity companies are privatised the people of NSW will be worse off with residents and businesses left paying higher electricity bills.

WHAT THE SELL OFF WILL MEAN FOR YOU:

- Higher electricity prices
- A less reliable network with more blackouts
- Massive local job losses
- Reduced public safety

NSW gears up to sell power network assets

The NSW government is preparing to sell the state's electricity networks in its second term.

Australian Financial Review, 20 August 2012

SIGN THE PETITION: STOP THE NSW POWER SELL OFF

To Mike Baird, NSW Premier: This petition of NSW residents opposes any sale or lease of the publicly owned NSW electricity network. We call on you to abort your privatisation plans and maintain full public ownership of Essential Energy, TransGrid, Endeavour Energy, Ausgrid and Networks NSW.
